The engine saved the Corvette from near oblivion and made Chevrolet the source of automotive history's dominant domestic engine. Subsequent SBC versions would sustain the legacy. The mid-1990s ...

~~Chevy's Little Engine That Could—The New York Times~~

In 1988, the L98 was tweaked for the last time on the Corvette. Modified aluminum cylinder heads were inserted onto the engine, which allowed the engine to breathe better, and the camshaft was revised. The modifications boosted horsepower by 5. The revised L98 had an output rating of 245 at 4,000 rpm and the torque remained the same.

~~1988 Corvette Parts and Accessories~~

The L88 427 c.i.d. engine is one of the most powerful Chevrolet big-block engines ever produced, and it was only available for a short time. The engine is most famously tied to the L88 Corvette from 1967 to 1969, and only 216 L88 Corvettes were manufactured during those years.

~~How to Identify an L88 Chevy Engine—It Still Runs~~

First introduced in 1967, the L88 Corvette featured a highly modified version of Chevy's 427-cubic-inch V-8 engine. Although this engine received a factory horsepower rating of 435, actual engine output was somewhere between 540 and 580 horsepower, giving the iStocki L88 enough power to run a quarter-mile in the high-11-second range!

~~The L88—The Pinnacle of All Corvettes—Famous Vettes—~~

The Chevrolet Corvette (C4) is a sports car produced by American automobile manufacturer Chevrolet from 1983 to 1996. The convertible returned, as did higher performance engines, exemplified by the 375 hp (280 kW) LT5 found in the ZR-1. In early March 1990, the ZR-1 would set a new record for the highest 24 hour-5,000 mile land-speed by going over a speed of 175 mph (282 km/h).

~~Chevrolet Corvette (C4)—Wikipedia~~

~~1967 Chevy Corvette L88—Vette Magazine~~

Zora Arkus-Duntov was incharge of the L-88 Corvette. It was intended for racing purposes, but only a few of the 216 L-88s produced actually raced on road racing courses or drag strips. These cars required super high octane gasoline rated at 103 octane to feed the 12.5:1 compression ratio pistons inside the special high performance 427 engine block.
