8. Female Reproductive Structures and Events Development and maturation of the female cone take 2-3 years, the exact time depends on the species. Female cones are typically produced on higher branches of the tree. Because the individual tree's pollen is generally shed downward, this arrangement favors crossing between different individuals 1.

~~Solved: The Female Gametophyte Of Pine Is Produced ...~~

Upon taking a blood meal, gametocytes are transferred to a mosquito's midgut lumen where they differentiate into male and female gametes. After complete sexual reproduction and successive processes of sporogonic development, mature sporozoites accumulate in the vector's salivary gland, ready to be inoculated into a new host. Therefore, the presence of gametocytes in circulation of infected individuals is imperative for malaria to remain endemic in a given community.

The alternate, nonsexual phase is the sporophyte. In the gametophyte phase, male and female organs (gametangia) develop and produce eggs and sperm (gametes), which unite in fertilization (syngamy). The fertilized egg (zygote) develops into the sporophyte, which produces numerous single-celled spores, which in turn develop directly into new gametes.

maternal factors before fertilization that are required for embryo and endosperm development after fertilization. Female gametophyte-expressed genes required for embryo and endosperm development are referred to as gametophytic maternal-effect genes (Ray, 1997; Drews et al., 1998; Drews and Yadegari, 2002).

~~Female Gametophyte Development | Plant Cell~~

Female gametocyte activation assay. Gametocyte cultures were produced as described above, with the exception that day 16 gametocyte cultures were used. The reason for this is that, reportedly, female gametocytes mature slightly later than male gametocytes in culture. An anti-Pfs25 antibody (4B7; obtained from MR4) was coupled to Cy3 by use of an Amersham CyDye monoclonal antibody labeling kit (GE Healthcare) according to the manufacturer's recommendations.
