Solution We can implement a pretty naive algorithm which tests every possibility. max := array[1] for i := 1 to n for j := i to n sum := calculateSum(i, j) if sum > max max := sum

Algorithm Design Manual – Solutions – panicktank  
Design and Analysis of Algorithm is very important for designing algorithm to solve different types of problems in the branch of computer science and information technology. This book is about data structures and algorithms as used in computer programming. We conclude our introduction to machine learning by discussing four simple.
