Aviapool (Aviation Tool Pooling LLC) is a global company providing around the clock assistance for the planning, supply, and sourcing of tooling equipment to the commercial aviation marketplace.

CRADLE ENGINE CFM56 AVIATION TOOLING - Aviapool

The CFM56-5B is the engine of choice for the A320 family, having been selected to power nearly 60 percent of the aircraft ordered. Today, it is the only engine that can power every model of the A320 family with one bill of materials. The engine's broad-based market acceptance has been because of its simple, rugged architecture, which gives it ...

ENGINE CRADLE AVIATION TOOLING - Aviapool

The CFM56 is a high-bypass turbofan engine (most of the air accelerated by the fan bypasses the core of the engine and is exhausted out of the fan case) with several variants having bypass ratios ranging from 5:1 to 6:1, generating 18,500 to 34,000 lbf (80 kN to 150 kN) of thrust. The variants share a common design, but the details differ.

Southwest Airlines Flight 1380 was a Boeing 737-7H4 that experienced a
failure in the left CFM56-7B engine after departing from New
York-LaGuardia Airport en route to Dallas Love Field on April 17,
2018. The engine cowl was broken in the failure and cowl fragments
damaged the fuselage, causing rapid depressurization of the aircraft
after damaging a cabin window.

The CFM engine family also includes a series of CFM56-5 engine class.
The class of such engines includes CFM56-5A, 5B and 5C. The engine
class of CFM56-5A and 5B is compatible with Airbus A320 series
aircraft. On the other hand, CFM56-5C is the only engine used to power
the Airbus A340-200 and -300 series. To hold support and hold the
