Our portfolio includes numerous major commercial and high end residential projects in New Providence and The Family Islands. Our reputation in protecting the financial and contractual interests of our local and international clients is second to none.

CCE Nassau

Construction cost estimating is the process of forecasting the cost of building a physical structure. Of course, builders and clients both worry about the financial impact of cost overruns and failing to complete a project. That's why they devote time and effort to estimating how much a project will cost before deciding to move forward with it.

~~Construction Cost Estimating: Basics and Beyond | Smartsheet~~

The initial construction cost for a electric rower line is known to be a function of the cross-sectional area A (in cm^2) and the length L (in kilometers). Let C_1 be the unit cost of construction (in dollars per cm^3). Then, the initial construction cost P (in dollars) is given by $P = C_1 A L(10^5)$
