Construction cost estimating is the process of forecasting the cost of building a physical structure. Of course, builders and clients both worry about the financial impact of cost overruns and failing to complete a project. That ' s why they devote time and effort to estimating how much a project will cost before deciding to move forward with it.

~~Construction Cost Estimating: Basics and Beyond | Smartsheet~~

The initial construction cost for a electric rower line is known to be a function of the cross-sectional area A (in cm 2) and the length L (in kilometers). Let C 1 be the unit cost of construction (in dollars per cm 3). Then, the initial construction cost P (in dollars) is given by $P = C 1 AL(10 5)$
