I teach Ecology but some nitwit at another campus decided this should be the lab manual for the course. It is horrible, I would say the labs are downright stupid. I think I used it for one lab and I had to modify that one. It is expensive, and I will tell my students to save their money and skip buying this lab manual.

This lab is designed to complement the lecture component of an ecology course. The purpose of the lab is to provide students hands-on experience in ecological research. This includes learning the natural history of local ecosystems, applying field methods, and testing ecological hypotheses. Among the four sections, I had 41 students.
