The Global Supply Chain Management Simulation is designed to teach intermediate to advanced concepts in supply chain design, demand forecasting, resource allocation, and production planning. The simulation gives students an opportunity to design and manage the supply chain of a global phone manufacturer.

The SCM Globe is a simulation that displays the four main entities of a supply chain (product, facilities, vehicles and routes). The main goal of this simulation is that users can figure out how to make a supply chain run 20-30 days with no disruptions and then make the supply chain run for the same period of time at the lowest operating cost
