College Algebra Lesson 8 : Parallel and Perpendicular

Page 12/45

Lesson 8 And Parallel and Perpendicular Lines Classwork Exercise 1.1. a. Write an equation of the line that passes through the origin that intersects the line 2 + 5 = 7 to form a right angle. b. Page 13/45

Determine
whether the
lines given by
the equations 2
+3 =6 and = 3 2
+4 are
perpendicular.
Support your
answer.

Lesson 8 And Parallel and Perpendicular Lines Classwork Exercise 1.1. a. Write an equation of the line that passes through the origin that intersects the line 2 + 5 = 7 to form a right angle. b. Page 19/45

Determine n whether the lines given by the equations 2 +3 = 6 and = 3 2+4 are perpendicular. Support your answer. c. Lesson 8: Parallel and Perpendicular Lines

Lesson 8 And Parallel And Perpendicular Lines Wordpress **Iftwo press** nonverticallines are perpendicular, then the product oftheir slopes is -1. If the slopes of two lines have a productof -I, Page 21/45

then the lines are pendicular perpendicular. LineMicrosoft PowerPoints-Lesson 3-8 (Slopes of Parallel and Perpendicular Lines) Author: heirigsm Created Date:

Lesson 3-8 Page 22/45

(Slopes of Parallel and Perpendicular Lines) This lesson unit is intended to help you assess how well students understand the relationship between the slopes of parallel and Page 23/45

perpendicular lines and in particular, to help identify students who find it. difficult to: • Find, from their equations, lines that are parallel and perpendicular. • Identify and use intercepts. Page 24/45

Lesson 19:
Parallel and
Perpendicular
Lines
Since slope is a
measure of the
angle of a line
from the
horizontal, and
Page 43/45

since parallel lines must have the same angle, then parallel lines have the same slope - and lines with the same slope are parallel. Perpendicular lines are a bit more complicated.
