Richardson Maturity Model steps toward the glory of REST A model (developed by Leonard Richardson) that breaks down the principal elements of a REST approach into three steps. These introduce resources, http verbs, and hypermedia controls.

## Richardson Maturity Model - Martin Fowler

Richardson Maturity Model (RMM) is a four-level scale that indicates extent of API conformity to the REST framework. The maturity of a service is based on three factors in this model: URI, HTTP Methods and HATEOAS (Hypermedia). If a service employs these technologies, it's considered more mature.

## Web API Design Maturity Model - Amundsen

26 August 2014. Martin Fowler. certification. agile adoption. process theory. A maturity model is a tool that helps people assess the current effectiveness of a person or group and supports figuring out what capabilities they need to acquire next in order to improve their performance.

## MaturityModel - Martin Fowler

This model of division of REST services to identify their maturity level – is called Richardson Maturity Model. Richardson used three factors to decide the maturity of a service i.e. URI, HTTP Methods and HATEOAS (Hypermedia). The more a service employs these technologies – more mature it shall be considered. The levels of maturity according to Richardson's model. In this analysis, Richardson described these maturity levels as below: Level Zero; Level One

## Richardson Maturity Model - REST API Tutorial

richardson maturity model martin fowler is available in our book collection an online access to it is set as public so you can download it instantly. Our book servers spans in multiple countries, allowing you to get the most less latency time to download any of our books like this one. Merely said, the richardson maturity model martin fowler is universally compatible with any devices to read

## Richardson Maturity Model Martin Fowler

Richardson Maturity Model A model (developed by Leonard Richardson) that breaks down the principal elements of a REST approach into three steps. These introduce resources, http verbs, and hypermedia controls.

## web services - Martin Fowler

The Richardson Maturity Model As mentioned previously, RMM is a tool to help you evaluate how RESTful a service is. This system of classification — first described by Leonard Richardson — provides...

### Richardson Maturity Model Martin Fowler

Hypermedia API maturity model v1.0.0-alpha.1. Leonard Richardson described a phased approach of REST API known as Richardson Maturity Model (RMM, Martin Fowler wrote a great post to explain it). This model ends with level 3, hypermedia controls, where it deals with hypermedia API. I tried to build a hypermedia API maturity model to evaluate the level of hypermedia-ness of an API.

### Richardson Maturity Model Martin Fowler

You can also check how mature your RESTful API is by using the maturity model by Leonard Richardson. It is well-described in the Richardson Maturity Model article by Martin Fowler....Well-documented. API without documentation is a no-go — your engineers won't simply get a clue of how to use it in the projects.
